2 STAGE OIL-SEALED ROTARY VANE VACUUM PUMPS

GVD 3-5

FEATURES AND BENEFITS

• 48 dB(A) and intrusive frequencies minimized.
• Dual mode. Suitable for high throughput and high vacuum applications.
• Easy-to-use gas ballast.
• Fast acting inlet valve for system protection.
• High torque, dual voltage/dual frequency motor, electronic start relay.

• Efficient high pressure lubrication.
• Oil-tight with printed gaskets, effective shaft seals.
• Clamped-in sight glass.
• Oil box well contains filling spills.
• Hi-tech polymer blades, large diameter, easy-clean oil passages.
• Consistent, built-in quality, cast bar construction.

* 2m long 1-phase cable to be ordered separately. 3-phase motors connect directly to terminal box.
APPLICATIONS

- Analytical instruments
- Centrifuges, ultra-high speed
- Coating
- Degassing/curing - oil, epoxy resin
- Distillation/extraction/filtration
- Freeze drying
- Furnaces
- Gas bottle filling/emptying
- Gel drying
- Glove boxes, ovens
- Laboratory bench top vacuum
- Leak detectors, Helium
- Load locks and transfer chambers
- Refrigeration manufacture
- Research and development
- Rotary, centrifugal evaporators
- Scanning electron microscopes - SEM
- SEM/FIB (ion beam repair)
- Surface science instruments
- Turbomolecular backing pumps

DIMENSIONS

PERFORMANCE CURVES

1: Without gas ballast.
2: With gas ballast open in position 1.
3: With gas ballast open in position 2.

For ultimate vacuum figures, please consult the technical specification table on the front page.
